

Product Specification Summary

Omni-Clean™ Gel DNA Purification Systems

Catalog Number	40-4120-10
Product Name	Omni-Clean™ Gel DNA Spin Column Purification System; 100 purifications
Size	100 Purifications
Description	Omni-Clean™ Gel DNA Spin Column Purification System

Purification of DNA from agarose gels and concentration of DNA by ethanol precipitation are routine protocols used in all molecular biology laboratories. The Omni-Clean™ system provides optimized reagents for rapid extraction of DNA from agarose gels, and for routine concentration of DNA. The DNA is concentrated, purified and completely salt-free. The Omni-Clean™ DNA Purification System takes advantage of the principle that DNA binds to powdered flint glass in the presence of chaotropic salts. This technique provides a rapid and efficient method for the purification of high quality DNA from solutions or agarose gel slices, and is suitable for cloning, sequencing, isotope labeling, and a host of other procedures.
